

Much more than just a genomic vision.
An Integrated PRECISION.

Vision+™ delivers exclusive genetic results, including:

Robotic Cow Index (RCI) for effective Robotic Milking

EcoFeed® scores for sustainable and profitable Feed Conversion Efficiency

Polled, Red, Muscle Weakness (MW) results among the standard markers

Along with **all genomic values reported** by Lactanet & CDCB and more...

Vision+™ empowers genomic results through Chromosomal Mating® and SStrategy™, with precision in genetic decisions, while controlling inbreeding, optimizing genetic gain and managing future herd inventory with an easy call to action.

Vision+™ is a strategic investment with testing options available to achieve the different needs of each herd and goals of every farmer:

20 Vision+™

Screen and pick **seedstock replacement heifers**

50 Vision+™

Mating decisions for **replacement heifers** and sale/purchase decisions for **sires**

75 Vision+™

Get maximum data of **high impact** AI sires, donor dams and key bloodlines

Vision+™

Much more than just a genomic vision.

An Integrated PRECISION.
